

## Kindra Helm

### Director

Kindra is responsible for business and associate development, project management and quality assurance for projects primarily in the public sector. She has been responsible for several successful large-scale Attevo projects within this sector, many of which include integration of the Accela Automation software platform.

Prior to joining Attevo, Kindra was a consultant with Callidus Software, an Enterprise Information Management consulting firm, leading large-scale incentive compensation implementations and managing every aspect of the projects from design and development to testing and implementation.

Before Callidus, Kindra was with Reallogic, which had just been acquired by Computer Associates (now CA). Having joined as a recent graduate, Kindra worked in numerous areas, including application development, report and database development, business process re-engineering and project management.

Kindra is a 1996 cum laude graduate of Ohio University's College of Business in Marketing, with concentrations in Finance and MIS. Kindra is currently involved with Ohio University as a member of their MIS Advisory Board and is also an MBA student mentor.
