

Senior Consultant - Lead Data Architect

Location: Great Lakes Region or East coast

Attevo is a global business and information technology consulting firm. We enable entities around the world to become more productive and sustainable by thinking strategically and facilitating the use of technology to optimize business process and implement enterprise solutions.

Attevo is expanding in the United States, Europe and southeast Asia. Our engagement track record speaks for itself. We apply business acumen and technology proficiency to solve complex problems for our clients. Our success drives growth opportunities for our existing and new associates. Attevo is currently seeking experienced individuals who are technically astute, business savvy, curious and competent. We want team members who possess the burning desire to be experts in their discipline. Attevo consultants are competent business people with a flair for technology.

Lead Data Architect is responsible for the design and development of Master Data Management and Enterprise Information Management technical solutions. This role is responsible for translating client and functional requirements into long term, robust, and scalable data model architecture. Lead Data Architect is also responsible for designing source data interfaces, articulating ETL requirements and modeling target databases. The position also requires experience leading project teams and working with multiple ETL products (Informatica, SSIS, DataStage) and Data Quality products.

Experience Level:

- 5 – 10 years experience in data management or data warehousing.

Job Responsibilities:

- Deep database skills (Oracle, SQLServer)
- Experience with data modeling tools (Erwin, Oracle)
- Extensive knowledge of data modeling concepts
- Experience with ETL tools (Informatica, IBM-Ascential)
- Experience with DQ tools (Trillium, IBM-Ascential, Business Objects DQXI, Informatica DQ)
- Provide leadership related to technical aspects of systems development and data management.
- Strong problem solving skills

Qualified applicants will have:

- Bachelor's Degree in Computer Science, Engineering, Management Information Systems, etc. or equivalent IS experience.
- Five (5) or more years of extensive system knowledge in both UNIX OS and open systems environments.

- Understanding of hardware configuration, installation, and maintenance.
- Excellent verbal and written communication skills.
