

## **Sr. Solution Engineer - Customer Interaction Practice**

### **Location:**

Cleveland, OH  
Marin County, CA  
Dallas, TX

### **Summary / purpose of this position:**

Attevo is a global business and information technology consulting firm. We enable entities around the world to become more productive and sustainable by thinking strategically and facilitating the use of technology to optimize business process and implement enterprise solutions.

Attevo is expanding in the United States, Europe and Southeast Asia. Our engagement track record speaks for itself. We apply business acumen and technology proficiency to solve complex problems for our clients. Our success drives growth opportunities for our existing and new associates. Attevo is currently seeking experienced individuals who are technically astute, business savvy, curious and competent. We want team members who possess the burning desire to be experts in their discipline. Attevo consultants are competent business people with a flair for technology.

Attevo is looking for a key-player capable of enabling a world-wide game change in customer interaction, initially deployed to the Financial Industry. The Senior Solution Engineer is responsible for design and development of client technology solutions for mobile Web, Web, SMS and other delivery channels. Your day-to-day responsibilities include:

- Timely delivery of customer solutions that meet and surpass customer expectations
- Integration, of the ClairMail server with our customers' backend applications. This will typically involve the development of Java mid-tier logic and web services
- Performing acceptance tests with our customers to demonstrate the functionality and performance of the solution delivered
- Transfer knowledge to other team members and our customers

### **Skills**

The ideal candidate will have the following qualifications:

1. Extensive knowledge of established and emerging software including:
  - Service Oriented Architectures – Web services, SOAP, REST
  - XML technologies – XSLT, DOM, SAX, JAXB

- Java / J2EE and Web technologies – HTML, JavaScript, Apache, Tomcat, Servlets, JSP
  - Spring framework
2. Expertise in designing and implementing Enterprise Application Interfaces with leading middleware technology such as MQ Series, Vitria, Fusion, etc
  3. Analyze, define and document technical specifications, system architecture, target performance metrics and test plans
  4. Interface with client (developers) on coding standards, best practices, explanation of technical aspects, acceptance tests and coach/training on use
  5. Support, maintain and document software functionality
  6. 5+ years in Object Oriented programming with 3+ years in J2EE. Experience in the financial industry a plus

### **Education**

Bachelors degree required
